

3. Rain Barrels may not be installed on the side of any house or at any other location that is visible from a street, another lot, or a common area. A property owner may apply to install Rain Barrels in these locations only if there is no other area on the property owner's property in which to install the Rain Barrels.
4. Each Rain Barrel must only be fed by a single downspout from a standard residential gutter and must be located directly beneath the downspout's exit from the gutter so as to minimize downspout length.
5. Rain saucers are not permitted.
6. All Rain Barrels must be installed at ground level and on a concrete base, either pre-cast or poured on-site.
7. Only commercial and professional grade Rain Barrels are permitted.
8. Rain Barrels must be made of heavy-grade rigid plastic, be a color consistent with the color scheme of the property owner's home, and shall not be painted.
9. Rain Barrels shall not display language or other content that is not typically displayed by such a barrel or system as it is manufactured.
10. Rain Barrels must be fully enclosed and have a proper screen or filter to reduce mosquito breeding, algae, and other contaminants. Rain Barrels must have the ability to be drained for maintenance and cleaning.
11. Rain Barrels shall not create unsanitary conditions, odors, or be a nuisance to any neighboring properties.
12. The overflow from any Rain Barrels must discharge to the same location as the downspout feeding the Rain Barrels and the drainage of the lot on which the Rain Barrel is installed shall not be altered to affect neighboring properties.
13. Rain Barrels shall not exceed a 60 gallon capacity.
14. Rain Barrels shall not be chained or connected together.

**B. Applications to Include:**

1. A completed application including the purpose of the installation.
2. A site plan showing the proposed location of the improvement and distance from any streets, neighboring properties, and common areas. Photos of the location must be included.
3. The manufacturer's brochure or website address detailing the product to be installed and containing photos of the product.
4. Any ancillary equipment and the location of this equipment including but not limited to the screen or filter used to enclose the Rain Barrels.
5. The color or colors of the Rain Barrels and any accompanying equipment.
6. The size, dimensions, and number of any Rain Barrels and accompanying equipment.
7. The collection method.
8. The potential visibility from streets and neighboring properties or common areas.
9. Any noise, odor or drainage issues associated with the Rain Barrels or accompanying equipment.
